DETAILED ACTION

Drawings

The replacement drawing sheet submitted on June 2, 2005 has been received and entered of record into the file. The corrected drawing is acceptable.

Response to Amendment

The amendments to the specification and the claims submitted on June 2, 2005 have been received and entered of record into the file. The amendments are accepted.

Allowable Subject Matter

Claims 1, 3, 4, 8-10, 12, 13, 15, and 17-23 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination fails to disclose a device or method for the analysis of the water content of paper wherein light is preferentially provided to a series of detectors by a series of high and/or low pass filters as recited in the combination of elements and steps of claims 1 and 10. Dahlin (US 3,641,349) measures the water content of paper at two wavelengths using two detectors, but uses a beam splitter to divide the light beam between the two detectors. With a beam splitter half of the light beam is lost at each junction. The use of high and low pass filters in the present invention allows more light at the wavelengths of interest to be passed through to successive detectors, thereby improving the sensitivity of detection. Ortyn et al. (US 6,608,682) discloses a detector system using dichroic filters to preferentially provide light to different detectors, but the light is not at a specified wavelength for determining the water content of paper. Sui et al. (US 5,995,235) discloses a detector system which uses band pass filters to preferentially provide light at specific wavelengths to different detectors, but is not concerned

with the determination of water in paper. Hyvarinen et al. (US 6,495,831) determines the water content of paper but uses a grating spectrograph and array detectors to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
